

The diagram illustrates the Android Architecture Stack, showing the layers from the user-facing applications down to the operating system kernel. The layers are represented by light blue rounded rectangles with black borders, stacked vertically. The top layer is 'Applications', followed by 'Application Framework'. Below these are two parallel layers: 'Native Libraries' on the left and 'Core Libraries' and 'Dalvik Virtual Machine' on the right. The bottom layer is the 'Linux Kernel'.

Applications

Application Framework

Native  
Libraries

Core Libraries

Dalvik Virtual  
Machine

Linux Kernel
